The consideration of the Vessel of US\$8,700,000 (approximately HK\$67,860,000) was determined by reference to market intelligence the Company has gathered from shipbrokers and its own analysis of recently concluded sale and purchase transactions of vessels of comparable size and year of built in the market, and on the basis of arm's length negotiations with the Purchaser.

We observe and monitor the sale and purchase market of second hand vessels, including recent market transactions of similar vessels between willing sellers and willing buyers in that prevailing time presuming the vessel free from all registered encumbrances, maritime liens and all debts, free of charter or any contract of employment, for cash payment on normal sale terms at that particular of time. However, as each vessel is never identical, buyers will take into account, the individual specification, maintenance quality and conditions of each individual vessel to come up with an offer. Management has based on the experience, market knowledge to consider the acceptance of the bidders' offers.

Vessel

The Vessel is a Supramax of deadweight 52,961 metric tons, built in year 2003 and registered in Hong Kong. The Vendor is a special purpose company for holding solely the Vessel.

The Vessel has been owned by the Group since year 2007, and its unaudited net book value as at 31 March 2018 was approximately HK\$59,974,000. The net profit both before and after taxation and extraordinary items attributable to the Vendor for the financial year ended 31 December 2017 was approximately HK\$2,573,000 while net loss both before and after taxation and extraordinary items attributable to the Vendor for the financial year ended 31 December 2016 was approximately HK\$10,785,000.

Possible financial effects of the Disposal

Based on the unaudited net book value of the Vessel as at 31 March 2018 as described above, the Group would realize a book gain of approximately HK\$6 million on disposal of the Vessel. The book gain for the Vessel was calculated after estimated expenses of approximately HK\$1.5 million, which mainly includes commission and legal fees. However, the actual book gain which the Group would realize upon completion of the Disposal will depend on the actual net book value of the Vessel as at date of delivery in accordance with the Group's impairment and depreciation policy for its vessels as shown in the Company's annual report and the actual costs of disposal being incurred of the Vessel as at date of delivery.

Use of proceeds

The Group intends to keep all net sale proceeds received as general working capital of the Group.

REASONS FOR THE DISPOSAL

The Directors continuously review the prevailing market conditions of the shipping industry and monitor and adjust the Group's fleet profile as appropriate. The Directors believe that the Disposal will enable the Group to enhance its working capital position and further strengthen its liquidity, and optimize the fleet profile through this ongoing management of asset portfolio.

Despite the recent improvement in shipping market, we continue to see uncertainty and market volatility remaining as an operational risk to the Group. In order to further reduce operational risk and liquidity risk, we believe it is prudent for the Group to readjust the fleet size according to the age profile and it is also important to remain financially nimble in today's ever-changing market environment. The Disposal would result in a book gain and generate positive cash inflow to boost its working capital and liquidity. Looking ahead, we will continue to focus on taking sensible and decisive actions to maintain a strong financial position. We will continuously monitor the market as well as our operations going forward and look out for opportunities to maintain a reasonably modern and competitive fleet, not ruling out any future disposal or acquisition of vessels and will make such decisions on an ad hoc basis to maintain a high financial flexibility and operational competitiveness.

Before the completion of the Disposal, the Group currently owns two modern Post-Panamaxes and nineteen modern grabs fitted Supramaxes including the Vessel. Total carrying capacity will be reduced by 52,961 metric tons to 1,187,387 metric tons after the Disposal, and the Directors believe that the Disposal will not have any material adverse effect on the operations of the Group.

The terms and conditions of the Agreement have been agreed on normal commercial terms following arm's length negotiations with reference to the prevailing market values. The Directors consider that the Disposal represents an opportunity for the Group to readjust its fleet profile and reduce our operational risk exposures in current high-risk volatile markets and the Disposal will improve the liquidity position of the Group. The Directors consider that the terms and conditions of the Agreement was concluded between a willing seller and willing buyer and concluded base on arm's length negotiations, the Directors consider such terms and conditions are fair and reasonable and believe that the Disposal is in the interests of the Company and its shareholders as a whole.

LISTING RULES IMPLICATION

As one or more applicable percentage ratios (as defined in the Listing Rules) for the disposal of the Vessel exceed 5% but are less than 25%, the Disposal constitutes a discloseable transaction for the Company under Chapter 14 of the Listing Rules and is subject to the notification to Stock Exchange and publication of announcement requirements under the Listing Rules.
