REASONS FOR THE ACQUISITION OF THE VESSEL

The Group's principal activities are international ship chartering and ship owning. The Directors continuously review the prevailing market conditions of the shipping industry and monitor and adjust the Group's fleet profile as appropriate. Despite the recent improvement in shipping market, we continue to seek to fine tune the quality of our fleet, in particularly in terms of seeking to lower the overall age profile of our fleet. We try to strike as good as possible, the balance of additional maintenance costs that is associated with the aging of a vessel, the expected revenue generating ability and cargo flexibility when compared to younger vessels, the potential asset value appreciation of an asset, as well as the importance of ensuring we are financially nimble by monetizing suitable assets. We believe in being prepared at all times for future possible opportunities of redeployment of capital into other more suitable assets that may arise going forward while keeping leverage at

comfortable levels. We will continuously monitor the market as well as our operations going forward and look out for opportunities to maintain a reasonably modern and competitive fleet, not ruling out any future disposal of smaller and older vessels and replace with newer vessels with larger carrying capacity and longer asset lives. We will make such decisions on an ad hoc basis to maintain a high financial flexibility and operational competitiveness.

The Group currently owns twenty four modern grabs fitted Supramaxes with existing carrying capacity of 1,373,222 metric tons. As at date of this announcement, a Supramax will be disposed by the Group during the fourth quarter of 2023 as announced by the Company on 20 September 2023.
